Focus Me- “Stay disciplined, Stay productive”

1. Problem Statement

In today's digital world, distractions are everywhere social media, messaging apps, and endless notifications make it difficult for students and professionals to concentrate. Many people struggle to stay focused long enough to complete meaningful work, leading to decreased productivity and stress from unfinished tasks.

This problem especially affects students, remote workers, and young professionals who must manage their time independently but lack effective focus tools that are simple and motivating.

Our target user is Mariamawit, a 21-year-old college student who often studies from home. She finds it hard to stay off her phone and concentrate on her coursework. Mariamawit wants an app that helps her build focus habits, stay on track, and feel rewarded for her effort without being too complicated or overwhelming.

2. Proposed Solution

FocusMe is a minimal, distraction-free productivity app that helps users improve concentration by working in focused sessions.

When users start a session, the app sets a timer, tracks their focus period, and encourages them with motivational quotes. The app also records how many sessions the user completes daily, helping them visualize their productivity progress over time.

This simple system trains users like Mariamawit to work smarter, not longer, turning focused work into an achievable daily habit.

3. Core Features (MVP)

1. **Focus Session Timer:** Allows users to set custom focus durations (e.g., 25, 45, or 60 minutes) and start a distraction-free countdown.
2. **Motivational Quotes**
 - a. Displays an uplifting quote at the start of each focus session to keep users mentally inspired.
3. **Progress Tracking:** Display daily progress and session completion rate.
4. **Recent Sessions:** Show history of past focus sessions.
5. **Set Daily Goal:** Allow users to set and monitor a daily focus goal.

4. Team Members & Roles

Name	Role	Responsibilities
Asaph	Project Lead	Oversee app design and logic flow, manage project deliverables.
Rediet Daniel & Meron Mesfin	UI/UX Designer	Design clean, user-friendly interfaces for all app screens
Ahmed Beshir& Kassahun	Lead Android Developer	Handle Android development

Summary

FocusMe is a simple, yet powerful productivity companion app designed for anyone who struggles to stay focused on a world full of distractions. By combining focus sessions, motivational encouragement, and light progress

tracking, it offers a balance of discipline and positivity, helping users turn focus into a daily habit.
